EDUCATION

University of Virginia | School of Engineering and Applied Science

Charlottesville, VA

Bachelors of Science in Aerospace Engineering and Data Science

Class of 2029

GPA: 3.56

EXPERIENCE

Rocketry Club | University of Virginia

Charlottesville, VA

Research and Design Team

August 2025 – Present

- Collaborate cross-functionally on the redesign of an oxidizer system and overall design of a K-class hybrid rocket engine
- Support system-level design, analysis, and design verification using CAD Modeling and ANSYS CFD

NASA's Virginia Space Grant Consortium

Hampton, VA

Intern

June 2026 – August 2026

- Mentored groups of nine scholars as they navigated teamwork in the engineering industry
- Reviewed and corrected 10+ research papers, proposals and presentations for technical accuracy and quality as part of a proof-of-concept satellite proposal

Iridium Communications | Satellite Network Operations Center

Leesburg, VA

Capstone Intern

May 2025 – June 2025

- Developed a Python-based machine learning model to analyze satellite propellant-consumption data and identify patterns in fuel usage across orbital maneuvers

NASA's Virginia Earth Science System Scholars

Hampton, VA

Scholar

September 2024 – August 2025

- Completed NASA-developed coursework on satellite data tracking and Earth sciences
- Managed and coordinated a 12-person team through the design and documentation of a conceptual satellite for ice-sheet elevation tracking

NASA's Virginia Aerospace Science and Technology Scholars

Hampton, VA

Scholar

September 2023 – August 2024

- Collaborated with a multidisciplinary team to design a hypothetical crewed NASA mission to Mars
- Served as Risk and Radiation Specialist, researching radiation hazards and mitigation strategies to reduce crew exposure

PROJECTS/RESEARCH

Adaptive Landing Gear for Vertical Take Off and Landing Aircrafts

2024 - 2025

Independent Research | Virginia State & Regional Science and Engineering Fair

- Designed and built an adaptive landing gear system with SolidWorks CAD for UAVs, reducing landing tilt to <3% on uneven terrain with inclines up to 70%
- Created an automated response system using C++ and data logging
- **Awards:** 1st Place Leidos Award for Applied Science; 2nd Place Overall; IT Cadre Innovation Award

SKILLS

Data & Programming: Python, C++, Java, Data Analysis, Data Logging

Engineering & Simulation Tools: SolidWorks, AutoCAD, ANSYS Simulation Software, MATLAB, Arduino IDE, Circuit Design, 3D Printing

Professional: Technical Writing, Project Management, Collaboration, Presentation, Public Speaking, Teamwork, Microsoft Office Suite
